PB30 Contract 01 - export control compliance and supply chain risk management playbook Demo Agreement

This synthetic agreement is between Siemens Legal Operations and Export Control Counterparty 01. It is generated for Lou contract review demos and is not legal advice.

1. Commercial Background.

The parties are entering a transaction governed by playbook PB30: export control compliance and supply chain risk management playbook. The commercial purpose is: Addresses compliance with export control regulations and mitigating risks in the supply chain related to controlled goods and technologies.

2. Pre-contract due diligence on export control compliance.

Preferred drafting position: Verify exporter/importer license status. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

3. Onboarding of suppliers for export control risk assessment.

Preferred drafting position: Conduct mandatory export control training. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

4. Pre-contract evaluation of controlled technologies.

Fallback drafting position: Review technical documentation for export controls. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

5. Compliance with ITAR regulations during contract negotiations.

Escalation issue: Unauthorized transfer of defense articles. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

6. Pre-contract verification of export control documentation.

Preferred drafting position: Confirm all required export documents are in place. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

7. Onboarding of foreign entities for export control compliance.

Preferred drafting position: Verify foreign entity's export control compliance. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

8. Compliance with EAR regulations during contract execution.

Fallback drafting position: Verify compliance with export licensing requirements. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

9. Pre-contract review of export control obligations.

Preferred drafting position: Clarify export control responsibilities of all parties. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

10. Operational Exception.

The supplier may use experimental workflow tooling for internal reporting without prior written approval, provided no regulated data is exported. This clause is intentionally outside some playbook coverage so Lou can surface unmapped review findings.

11. Signatures.

The parties agree to the terms above through duly authorized representatives.
