

PB15 Contract 01 - export control compliance playbook Demo Agreement

This synthetic agreement is between Siemens Legal Operations and Export Control Counterparty 01. It is generated for Lou contract review demos and is not legal advice.

1. Commercial Background.

The parties are entering a transaction governed by playbook PB15: export control compliance playbook. The commercial purpose is: A comprehensive framework for ensuring compliance with international export control regulations across global operations.

2. Pre-contract due diligence on export control risk.

Preferred drafting position: Conduct thorough pre-contract export control screening. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

3. Onboarding of foreign entities for export compliance.

Preferred drafting position: Implement mandatory export compliance training for all foreign entities. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

4. Verification of end-use of exported goods.

Fallback drafting position: Rely on third-party verification. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

5. Compliance with ITAR regulations for defense articles.

Escalation issue: Export defense articles without ITAR authorization. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

6. Compliance with EAR regulations for dual-use items.

Preferred drafting position: Perform EAR compliance assessments for all dual-use items. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

7. Compliance with OFAC sanctions list screening.

Preferred drafting position: Implement real-time OFAC screening for all transactions. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

8. Compliance with export licensing requirements for non-U.S. entities.

Fallback drafting position: Rely on third-party compliance assurances. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

9. Compliance with export control documentation requirements.

Preferred drafting position: Maintain complete and accurate export control documentation. The parties shall keep records showing compliance, notify each other of material deviations,

and escalate unresolved issues to legal operations within five business days.

10. Operational Exception.

The supplier may use experimental workflow tooling for internal reporting without prior written approval, provided no regulated data is exported. This clause is intentionally outside some playbook coverage so Lou can surface unmapped review findings.

11. Signatures.

The parties agree to the terms above through duly authorized representatives.
