

This synthetic agreement is between Siemens Legal Operations and Export Control Counterparty 01. It is generated for Lou contract review demos and is not legal advice.

1. Commercial Background.

The parties are entering a transaction governed by playbook PB39: export control compliance audit playbook. The commercial purpose is: Guides organizations through the process of conducting audits to ensure compliance with export control regulations and mitigate potential risks.

2. export control compliance audit playbook.

Preferred drafting position: Conduct regular audits to ensure adherence to export control regulations. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

3. pre-contract export control due diligence.

Preferred drafting position: Verify all parties' export control compliance status before signing contracts. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

4. onboarding of foreign entities for export control.

Fallback drafting position: Onboard foreign entities with periodic checks. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

5. export control risk assessment for new clients.

Escalation issue: Risk assessment identifies significant compliance gaps. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

6. export control training for employees.

Preferred drafting position: Provide mandatory export control training to all relevant employees. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

7. export control documentation review during onboarding.

Preferred drafting position: Review all export control documentation during the onboarding process. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

8. export control compliance with OFAC sanctions.

Fallback drafting position: Screen transactions against OFAC sanctions lists on a case-by-case basis. The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

9. export control compliance with EAR regulations.

Preferred drafting position: Ensure all exports comply with the Export Administration Regulations (EAR). The parties shall keep records showing compliance, notify each other of material deviations, and escalate unresolved issues to legal operations within five business days.

10. Operational Exception.

The supplier may use experimental workflow tooling for internal reporting without prior written approval, provided no regulated data is exported. This clause is intentionally outside some playbook coverage so Lou can surface unmapped review findings.

11. Signatures.

The parties agree to the terms above through duly authorized representatives.
